Instruction to Authors – ICAM-2006

Manuscripts are accepted for review with the understanding that the same work has not been and will not be published elsewhere, nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission; further, that any person cited as a source of personal communication has approved such citation. At least one of the authors will register and attend the conference to present the paper if it is accepted.

This is a present to publish conference. One of the authors must register and present, in order for the paper to be published in the proceedings.

Written authorization may be required at the Editor’s discretion. Articles and other material published in the Proceedings represent the opinions of the authors and should not be construed to reflect the opinions of the Editors or the ISAM.

1. Copyright permission:
All original papers are copyrighted in the name of the ISAM (International Society of Agile Manufacturing). All original articles accepted for publication must be accompanied by a signed copyright transfer agreement. Previously copyrighted material may be published with the written permission of the copyright holder. Copies of any letters granting permission to reproduce illustrations, tables, or lengthy quoted passages should be included with the manuscript. Responsibility for the accuracy of the material in the manuscript, including appropriate references to related work, lies entirely with the authors. The Publisher will not put any limitation on the personal freedom of the author to use material contained in the paper in other work which may be published elsewhere, provided due acknowledgement is given.

2. Manuscript preparation:
Manuscripts should be formatted according to the instructions below and the sample paper attached (published earlier in the IJAM). Each page of the manuscript should be numbered, and illustrations, tables, and listings should be inserted at the appropriate places in the text. Only one illustration or table should appear per page. Color pictures should be transformed into black and white or gray scale pictures. Papers should be concise and in English. Normally, manuscripts (including tables, charts, and figures) should not exceed six pages. Page 1 should contain the article title, author(s) name and affiliations followed by a short abstract (200-500 words) and 5-10 relevant key words. All acronyms should be spelled out where first used.

3. Submission after Review & Acceptance:
The final paper after making changes suggested by the review board should be submitted in the following format.

   1) On the first page, the distance from the top edge of the paper to the top of the conference banner (ICAM International Conference on Agile Manufacturing) should be 1.5 inches.
   2) On the second and subsequent pages, the distance from the top edge of the paper to the top of the first line should be 1 inch.
