Instruction To Authors

Manuscripts are accepted for review with the understanding that the same work has not been and will not be published elsewhere, nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission; further, that any person cited as a source of personal communication has approved such citation. Written authorization may be required at the Editor’s discretion. Articles and other material published in IJAMS represent the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

1. Copyright permission:
All original journal articles are copyrighted in the name of the Publisher. All original articles accepted for publication must be accompanied by a signed copyright transfer agreement available from the journal editor or from the Publisher’s website. Previously copyrighted material may be published with the written permission of the copyright holder. Copies of any letters granting permission to reproduce illustrations, tables, or lengthy quoted passages should be included with the manuscript. Responsibility for the accuracy of the material in the manuscript, including appropriate references to related work, lies entirely with the authors. The Publisher will not put any limitation on the personal freedom of the author to use material contained in the paper in other work which may be published elsewhere, provided due acknowledgement is given.

2. Manuscript preparation:
Manuscripts should be formatted according to the instructions below. Each page of the manuscript should be numbered, and illustrations, tables, and listings should be inserted at the appropriate places in the text. Articles should be concise and in English. Normally, manuscripts (including tables, charts, and figures) should not exceed 5000 words. Page 1 should contain the article title, author(s) name, affiliations and e-mail addresses followed by a short abstract (200-500 words) and 5-10 relevant key words. All acronyms should be spelled out where first used.

3. Submission after Review & Acceptance:
The final paper after making changes suggested by the review board should be submitted in the following format.

2) On the second and subsequent pages, the distance from the top edge of the paper to the top of the first line should be 1 inch.
3) The text is to be in two columns, with a 0.2-inch column separation. The width of each column should be about 3.4 inches.
4) The bottom margin should be 1 inch on all pages. This is to allow for the insertion of page numbers.

References should be complete with the year, title, publication, volume, and the page numbers. Below are examples of entries for a paper, proceedings, and a book, respectively.

**8. Author biographies:**

Brief author biographies with photographs will be printed at the end of each paper. The biographical sketch is limited to 100 words and should describe the author(s)’ expertise, current position, publications, and technical interests. Submitted material may be edited by the Publisher.
