CALL FOR PAPERS
To be published in summer 2005

Papers are invited for this special issue on Lean to be published in summer 2005. In this issue on Lean, the focus will be on recent trends and developments in implementation of Lean in any industrial setup as well as its impact on the whole enterprise. Specifically papers addressing following topics are solicited:

- Lean enterprise transformation
- Aligning performance measures and incentives
- Lean enterprise assessment
- Use of discrete event simulation/hands-on simulation for Lean training
- Supply chain integration/management using Lean principles
- Lean Six Sigma
- Building infrastructure for Lean transformation
- Lean in E-Business
- Cultural barriers in implementation of Lean and possible remedies
- Lean in low volume and high variety industry
- Lean Vs ERP
- Managing system wide change during Lean implementation
- Implementing Technology to Enhance Agility

Apart from the above mentioned topics, papers of a more practical content will be welcomed, such as case studies and descriptions, experiences with Lean implementation.

All papers are to be published in English. Please submit the complete paper by March 15th, 2005. A review of the paper will be done and the authors will be notified of acceptance by April 30th, 2005.

Instructions for draft submission:

Single column, double space, Times New Roman size 12.

Please submit the paper to:
