	Required for Major	3

Essay Questions:

What changes, if any, could be made to the class that would have helped you to learn more? What could the instructor have done to make the course an even better learning experience?

Essay Questions:

No changes needed
Nothing
nothing this class was amazing
The tests. I can say that I would spend countless hours pouring over the material and when it came to test day, the questions weren't exactly what was being provided as study material. As in, the concepts would be worded in a different way or just some off the wall type of scenario that would really throw you off even if you genuinely knew the material. For a 101 level course, the tests were certainly discouraging to the overall learning experience to an otherwise absolutely incredible class.

What could you have done to make the course an even better learning experience?

I could've always put in more effort however I felt that no matter how much I did, I was always ill prepared for the actual tests. Otherwise was a great course.
nothing
Nothing
nothing this course was so much fun

What did you like most about the class and your instructor?

He cared and was a subject matter expert. Day in and out he had elaborate demonstrations to explain to a class of new physics students how some of these concepts worked. He gave us opportunities to ask questions always no matter how mundane or basic they were. Stayed after hours for additional instruction. Posted material on blackboard for less fortunate students who might not be able to afford the book required. Went through all of his power points and gave us as much feedback and answers to questions as possible. Graded the tests himself and gave us as much credit as he could. Went above and beyond consistently for the entire semester.
He was helpful, kind, and open to every question. When doing clicker questions he would take time to go around to students and help them understand it more, he asked for names and took a few seconds to scan the room to see if anyone was lost and confused.
he was so kind and enthusiastic, this was my favorite class to go to.
Professor Weinstein is very knowledgeable about physics and makes the class much more interesting

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

His examples that he provides after pretty much every topic was extremely helpful as was the clicker questions. The answer also responds to the second question
Reviewing my notes
The classroom demonstrations, the course material provided, the internet, and my own efforts. My own efforts helped me think critically.
the way he described things

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

Doing homework
I took really good notes all year
My efforts led to me learning the most.
