Essay Questions:

I could have spent more time on my homeworks.

What did you like most about the class and your instructor?

I loved how rigorous it was mathematically. I think I learned more multivariable calculus in this course then I actually did in Calc 3. Professor weinstein was also probably the professor I've learned most easily from. He has a talent when it comes to explanation, and encouraged students to ask how different scenarios would affect the equations.

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

Putting in hours and hours into studying/homework is crucial. Dr. Weinsteins recitations he held were extremely helpful, and I never missed one. The derivations of formulas that Dr. Weinstein would do and that were available in the book provided an explanation for the equations which made them seem less arbitray.

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

The amount of time you spend studying in this class and going to recitations directly corresponds to your grade. If I could have found more time to study and struggle with the material a little longer, I would have done better. But that really goes for any class.
